

# Silica Gel Activ-Strip™

Moisture Absorbing Film: 0.3 mm or 0.6 thicknesses

CSP Technologies provides Activ-Strip™ desiccant film in roll form. The material can be used loose or staked to the heat seal layer of the packaging material.

The roll width can be slit between 10 and 150 mm wide as required. The moisture absorbing capacity is given below as capacity per square centimetre area of film. The moisture capacity is linear based on area. The area of film required for your specific application can be determined from this value.

## TECHNICAL DATA SHEET

Film Thickness	0.6 mm	0.3 mm
Moisture Capacity	11 mg / cm <sup>2</sup>	5.5 mg / cm <sup>2</sup>
Desiccant	M-0020 Silica Gel (60% loading by weight)	
Colour	White	
Packaging	Supplied on rolls with 76 mm core Width up to 150 mm Packaged in Foil Bags	
Labelling	Description, Lot Number, other information as requested by customer	
Storage	Room Temperature
